

Augere backs the Entrepreneurial Success Award

Augere is supporting Greater Manchester Chamber of Commerce's inaugural Excellence Awards by sponsoring the Entrepreneurial Success category.

In working with exciting and innovative businesses across our region, at Augere we get a real buzz seeing good ideas and hard work translate into valuable business outcomes. Whether businesses are new start-ups with exciting ambitions, established businesses scaling up and growing fast through new products, channels or markets, or businesses overcoming significant operational challenges, we get really inspired seeing entrepreneurial leadership in action delivering successful outcomes.

“Being a successful entrepreneur means much more than bringing new business ideas to the table, it is much more about the calculated risks, determination and resilience required to drive out valuable outcomes against the odds”, says Managing Director Peter Fennell. “Given the challenges presented by COVID-19 these attributes have been essential to sustain success let alone drive profitable growth”.

Augere are proud to sponsor the Entrepreneurial Success award, to recognise those businesses and leaders who have achieved breakthrough performance or overcome adversity by committing to a new strategy and driving it through successfully.

The Chamber has launched the Excellence Awards in order showcase and celebrate the achievements and resilience of business across Greater Manchester's ten boroughs.

Set to culminate at an Excellence Awards Celebration on Thursday 28th October, they will highlight businesses, leaders and teams who have demonstrated success within their industries and communities.

The awards embrace all industries with other categories including Diversity & Inclusion, Exporting Excellence, Green & Sustainable Strategy and Business Diversification.

Nominations are open now with Friday 27th August the deadline for entries.
